GRADE 8

TIME TABLE

wednesday at 7:30 PM – 9.30 PM

A live class is a real-time online session where students actively interact with the teacher, ask questions, and receive instant feedback. This makes learning more engaging, helps clarify doubts immediately, and ensures better understanding of each lesson.

In Our Class

In live classes, students learn in real-time while directly interacting with the teacher. They can ask questions, receive instant clarification, and actively participate in discussions. Lessons are explained step-by-step to ensure clear understanding, and immediate feedback is given to help students improve their performance effectively.

We focus not only on teaching theory, but also on helping students score through effective exam techniques and structured answering methods. Lessons are delivered with clear explanations and interactive learning to ensure strong understanding. Individual attention is given, and lessons are repeated until every student fully understands. Recordings are provided, while live participation is encouraged for the best results.

Your Teacher

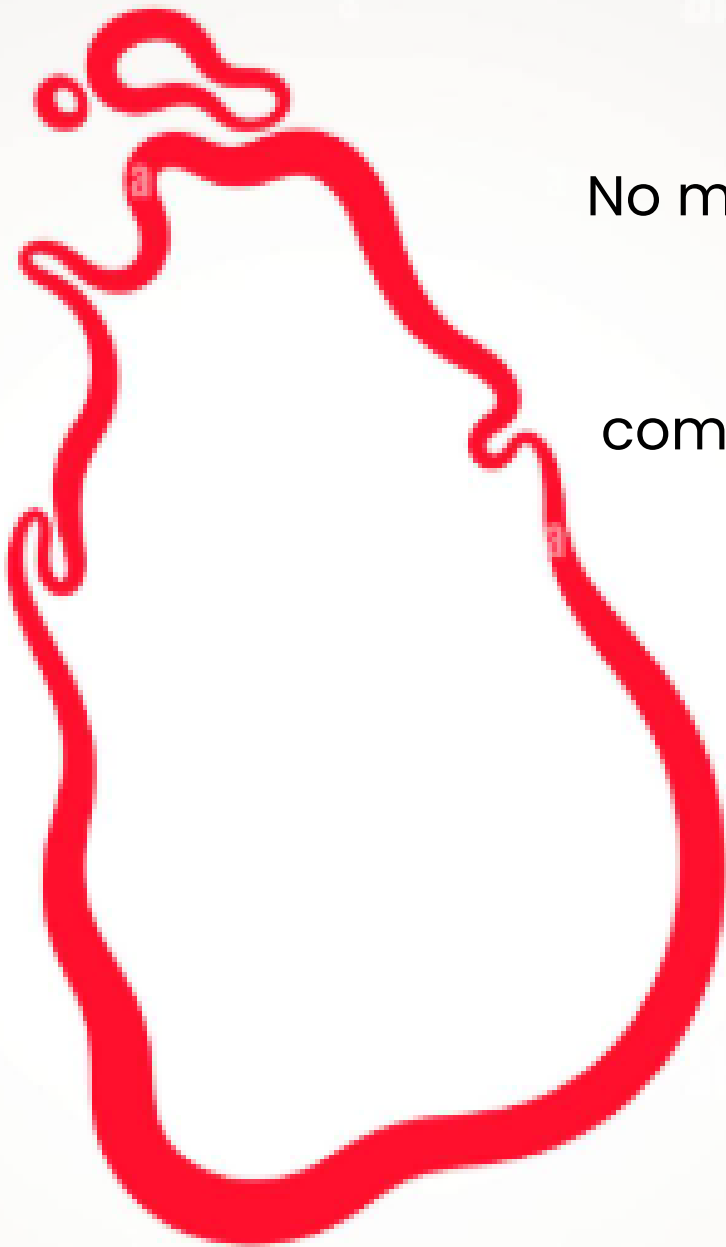

I am a BSc graduate with over 7 years of teaching experience, currently pursuing a Master's in Education. I focus on helping students clearly understand concepts and achieve better results through structured and engaging lessons.

With experience teaching in leading international schools and involvement in paper marking, I have a clear understanding of exam patterns, marking schemes, and effective answering techniques. I guide students not only to understand science, but also to perform confidently in exams.

My teaching approach is student-centered, combining clear explanations, interactive learning, and continuous support to ensure every student improves and reaches their full potential.

we Deliver Lessons Island - wide

No matter where you are
in Sri Lanka
Quality education
comes to your doorstep.

Experience expert
teaching, personal
attention, and
structured
guidance just like
having your own
teacher at home.

Practical Coverage

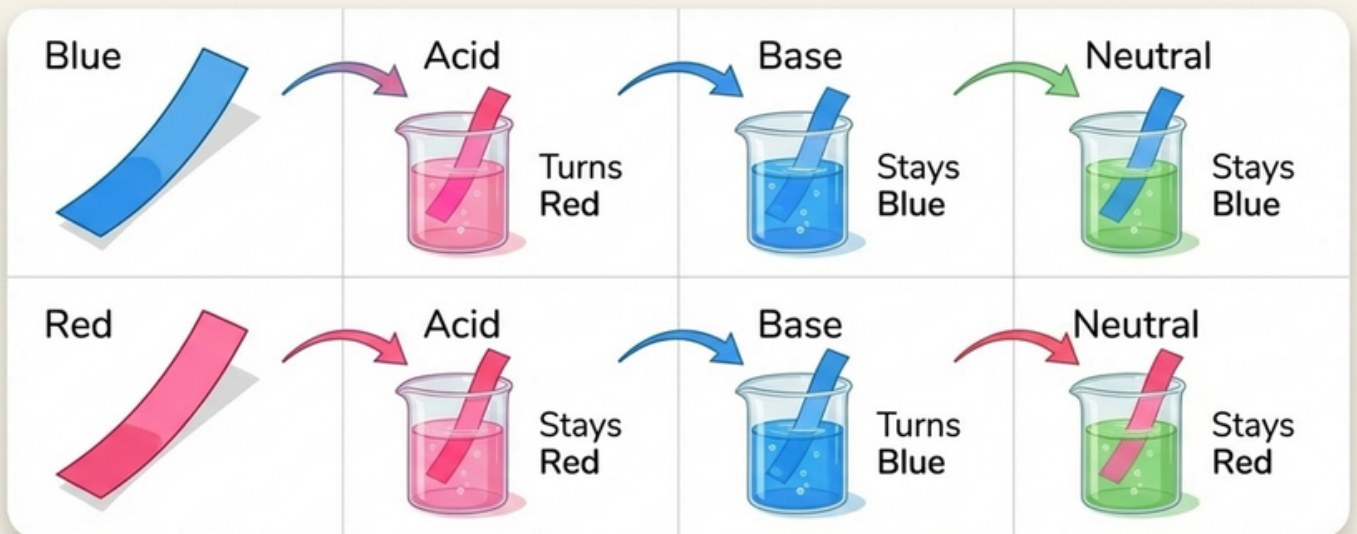

We believe real learning comes through doing, not just listening. Our classes focus on hands-on practical activities, helping students experience science in action making every lesson clear, engaging, and unforgettable

Practical approach makes complex topics simple, boosts memory, and builds real exam confidence. our child won't just study science they will truly understand it, leading to stronger results and a genuine love for learning.

Attractive Presentation-Based Learning

The Litmus Paper Test

The golden rule of litmus: Acids turn blue litmus red. Bases turn red litmus blue. Neutrals cause no change.

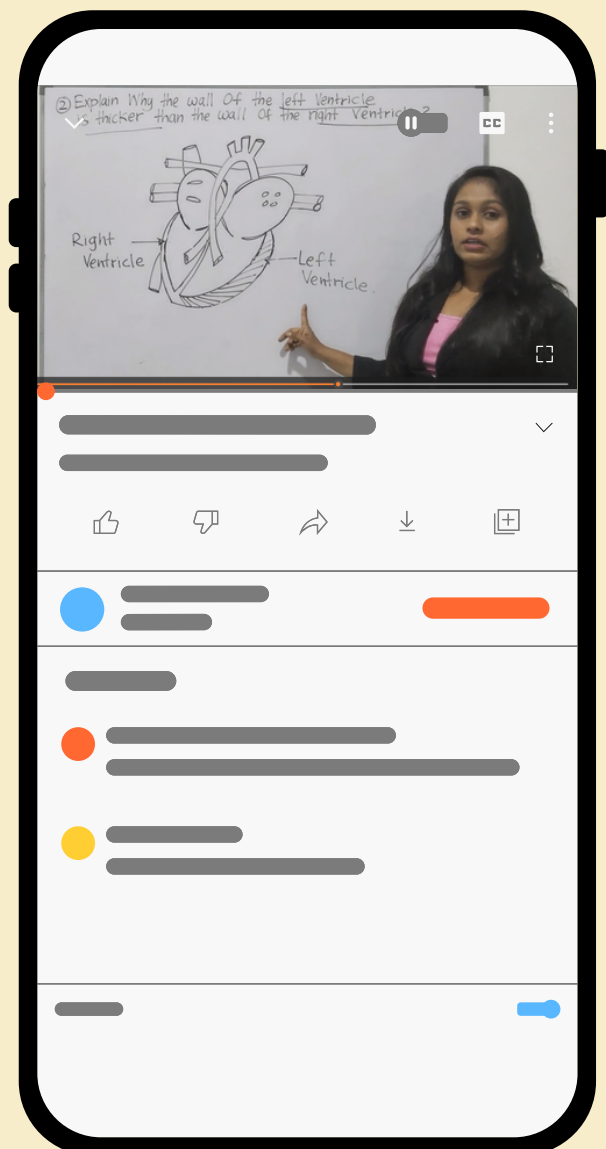

Transform complex science into clear, visual learning through powerful presentation-based teaching. Easy to understand, impossible to forget, where every lesson comes alive.

Practical Recording

After every practical, students receive clear, step-by-step theory discussions to understand not just what happens, but why it happens.

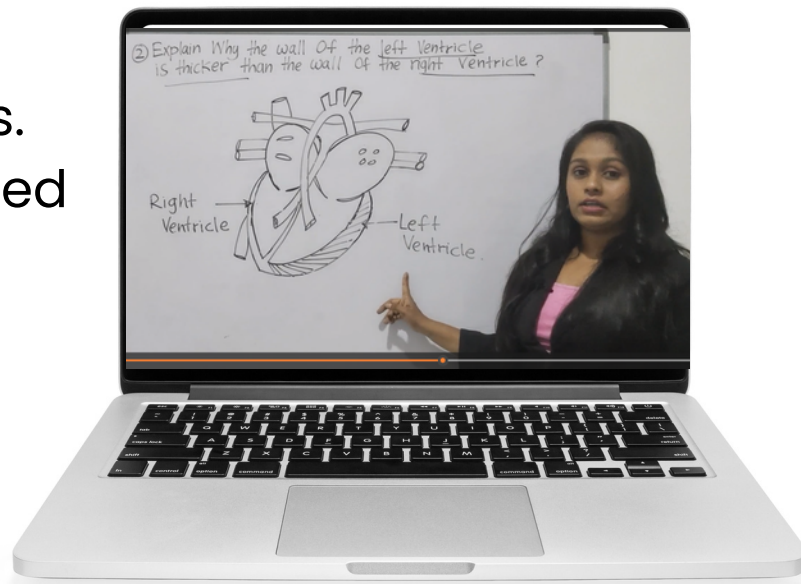

They are also trained in proper practical recording and presentation skills.

All notes are compiled into a well-structured Practical Guide provided free, giving students a powerful resource for revision, exams, and mastering science.

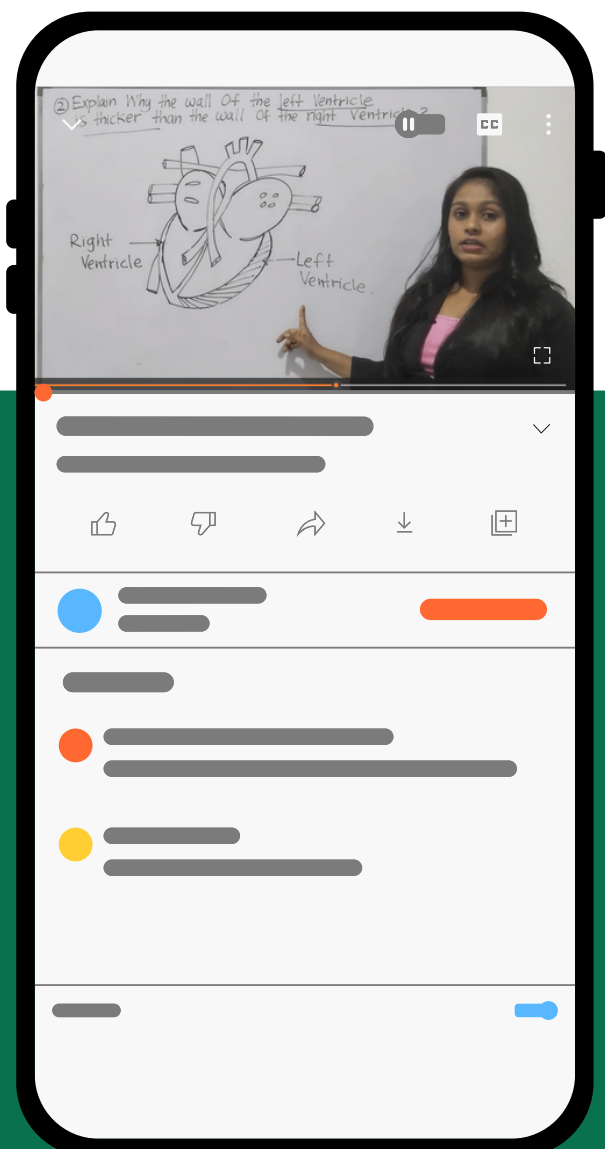

Class Recordings

Missed a class? No worries.
Every lesson is fully recorded
for easy access anytime.

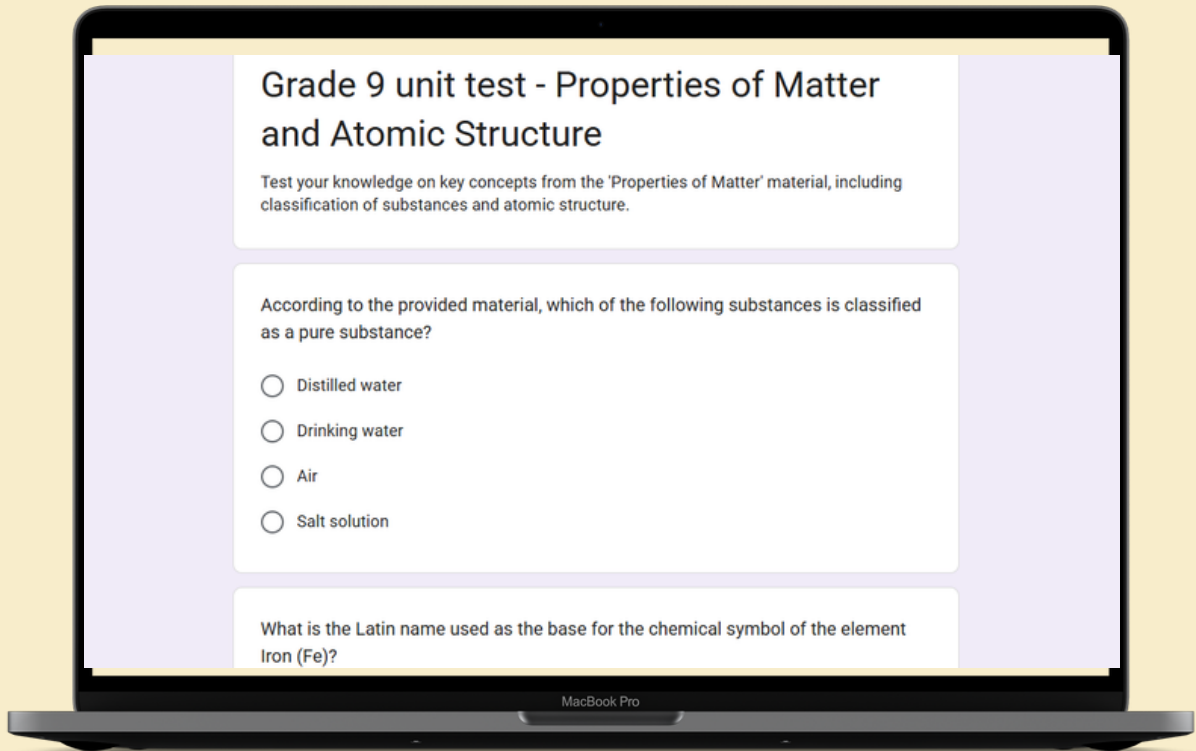

With full lesson recordings,
students can revise anytime,
master every concept, and
stay ahead ensuring
consistent top results.

UNIT TEST

Unit Tests after every lesson ensure no gap in understanding. They quickly identify weaknesses, strengthen concepts, and keep students consistently prepared, building confidence for top results step by step.

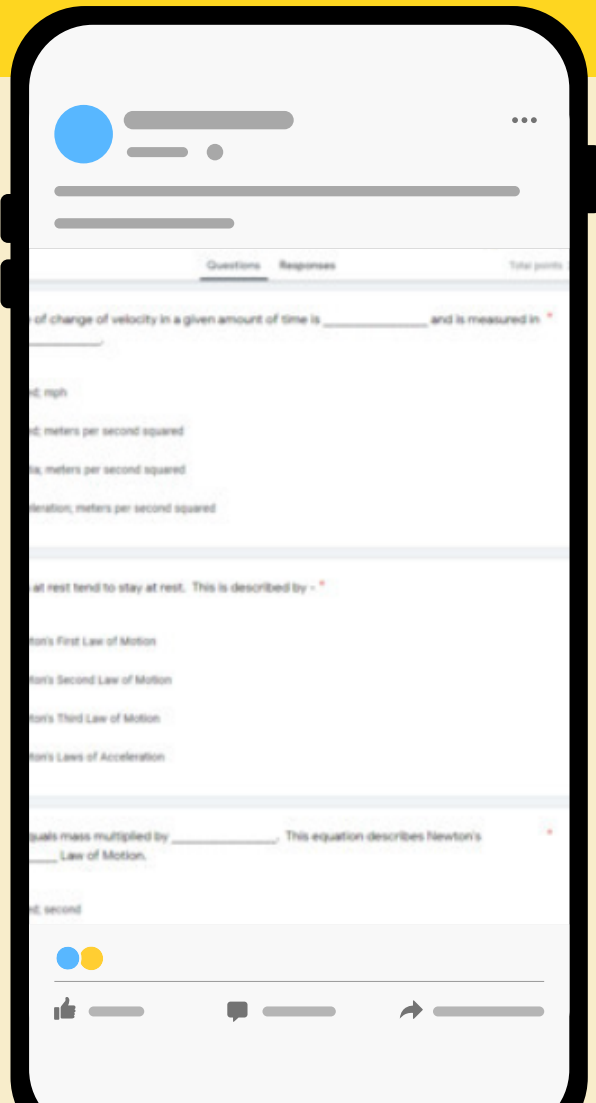

UNIT TEST

Mid Term Test

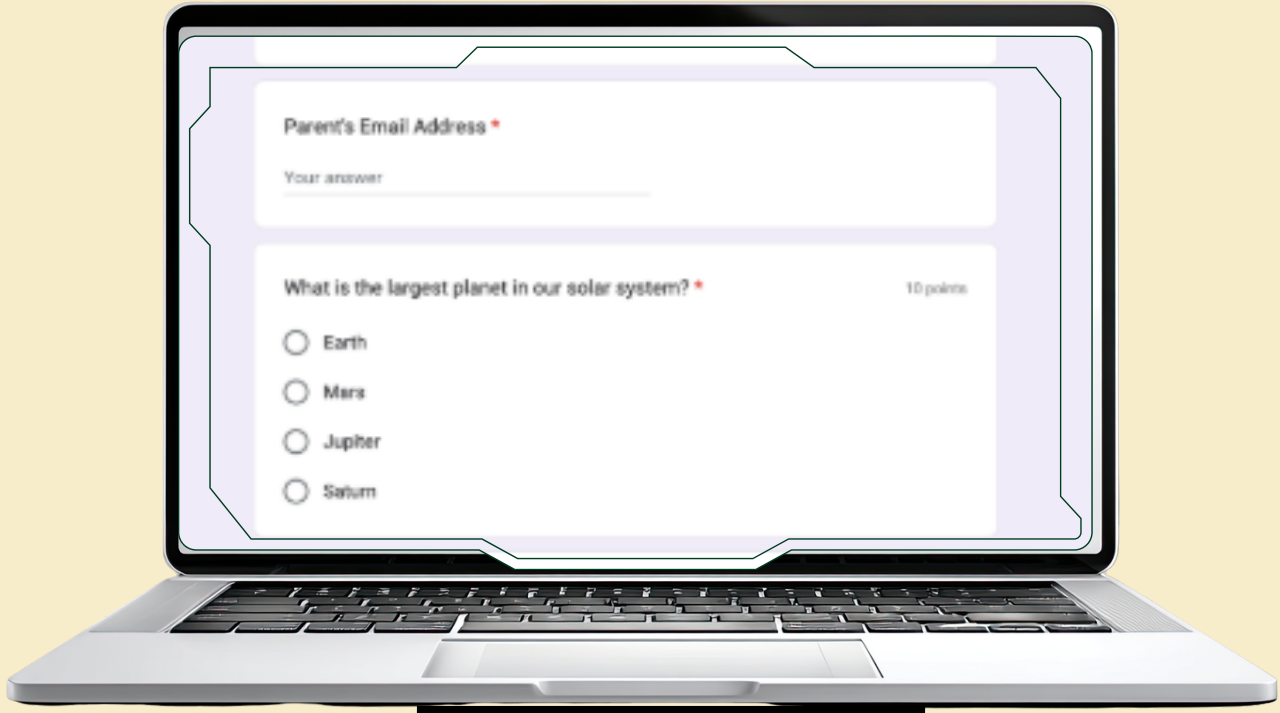

Mid-Term Tests track real progress and keep students on the right path

They drive revision, sharpen understanding, and build the confidence needed for higher performance, turning learning into real academic success.

Mid Term Test

Term test

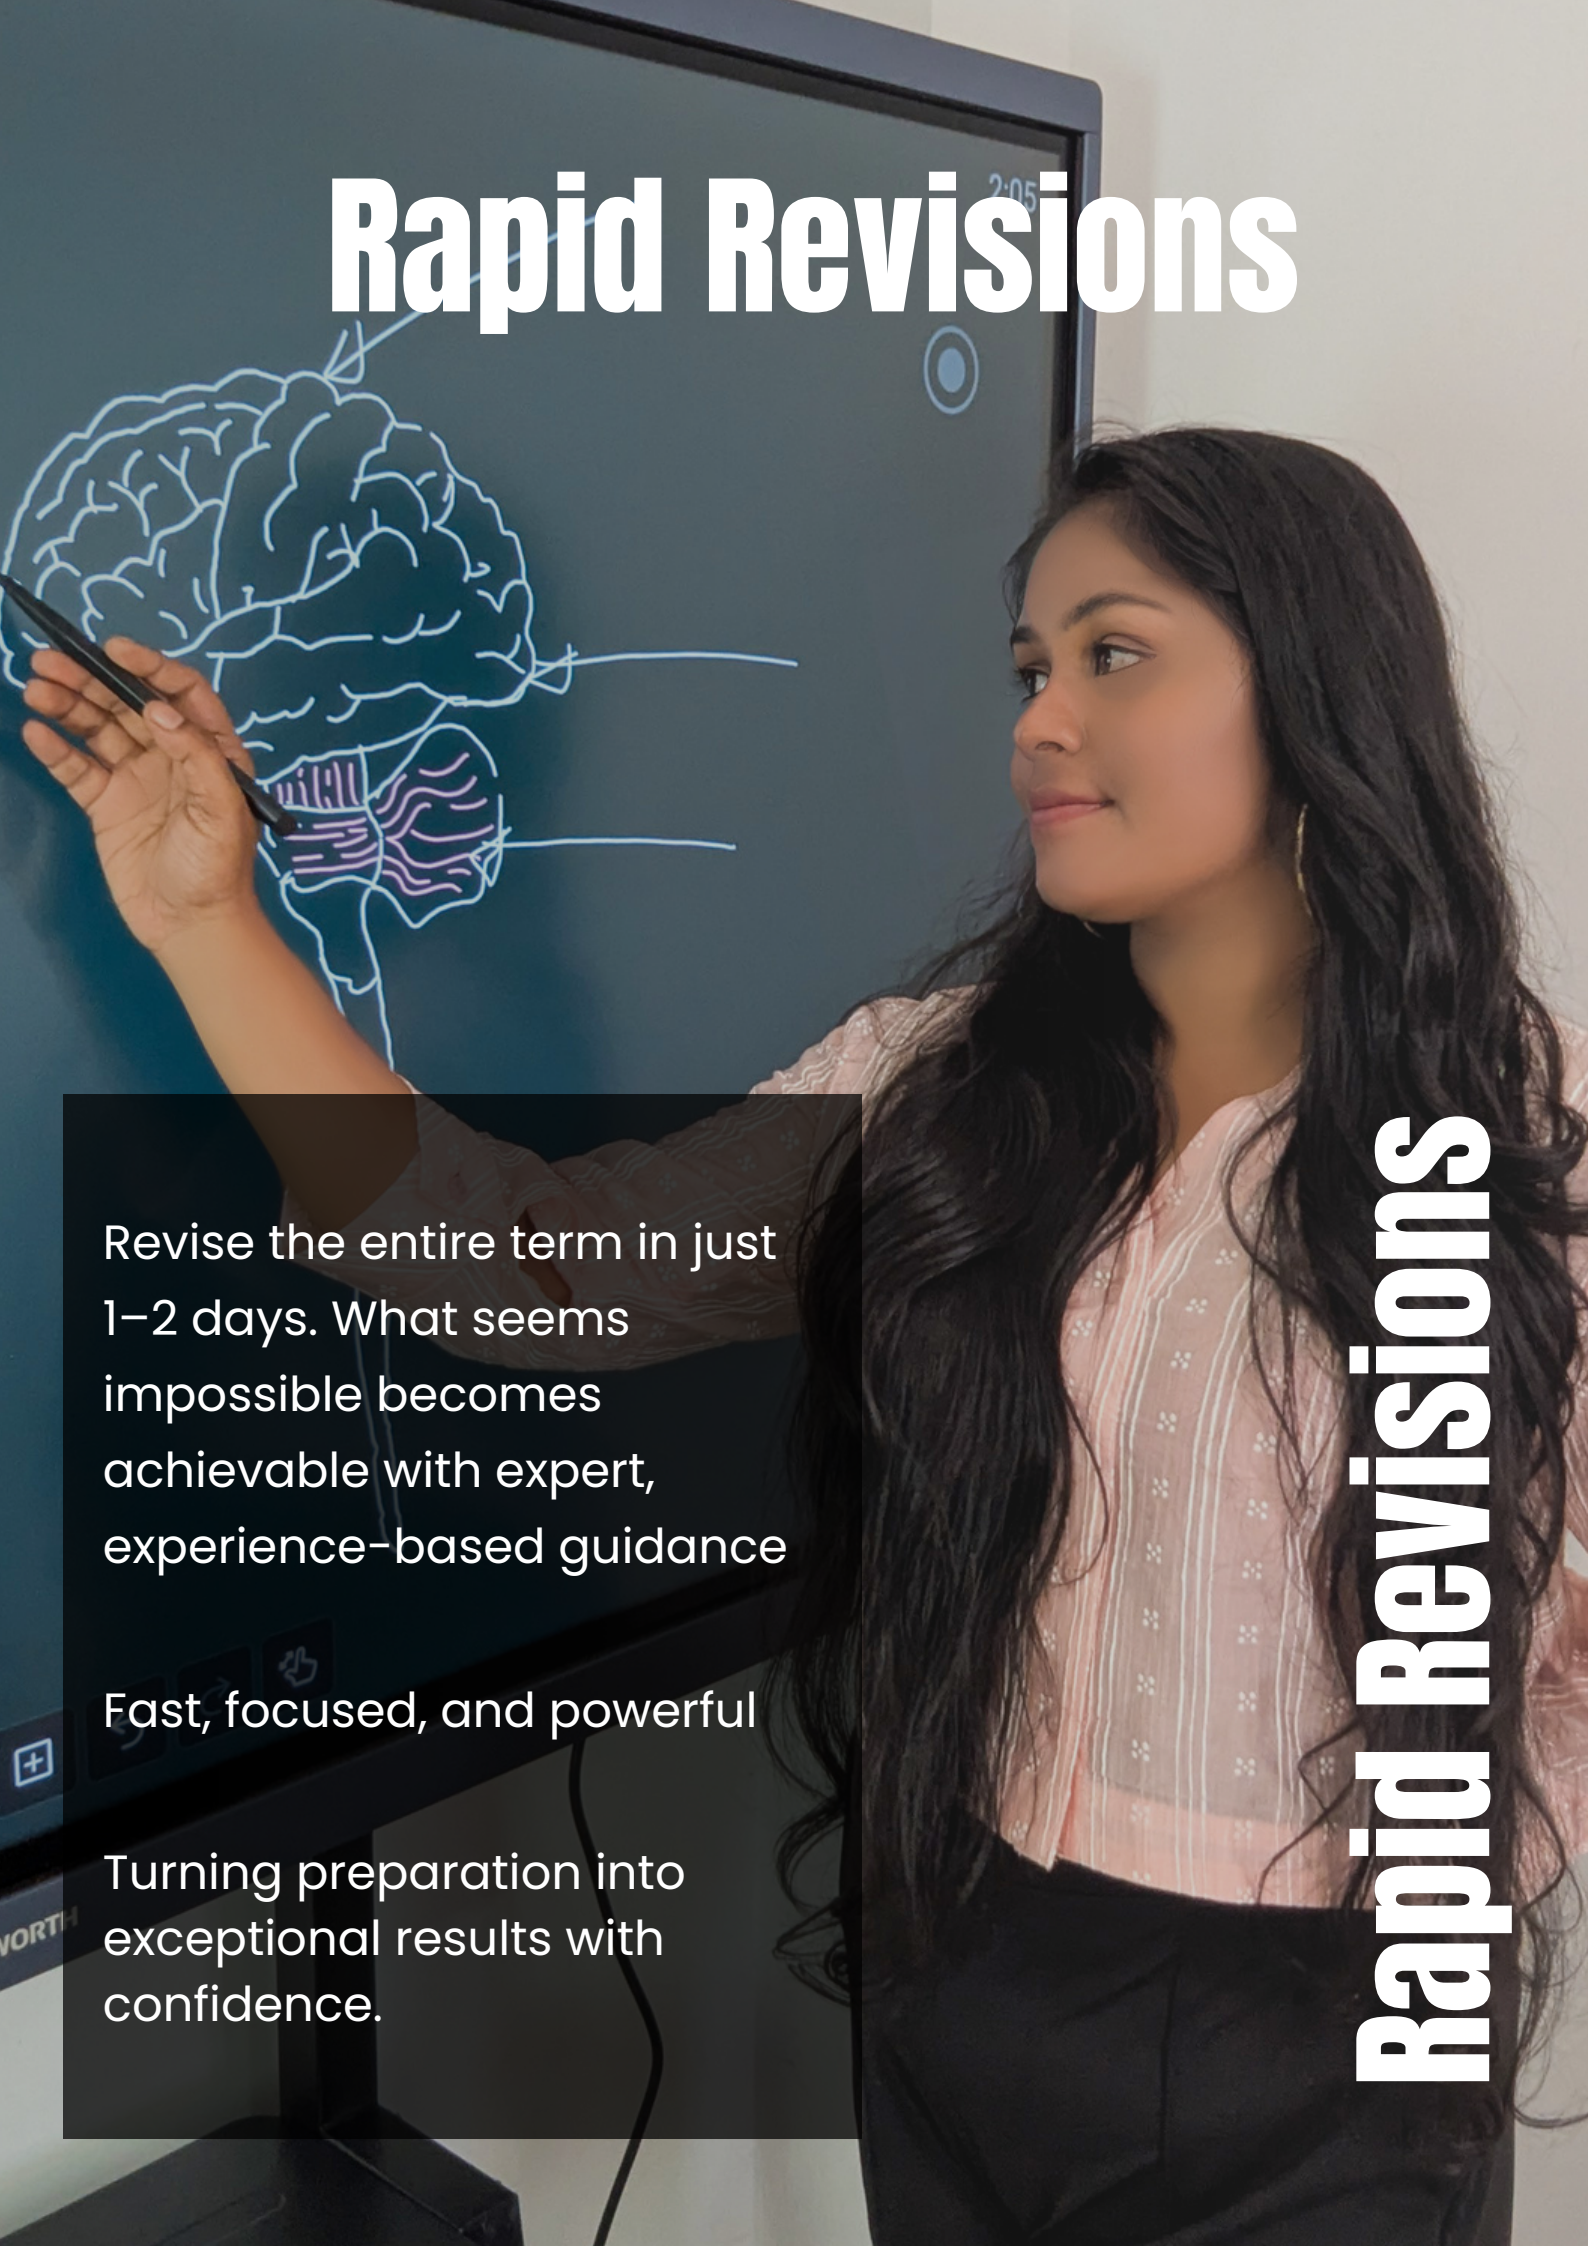

A complete assessment that measures understanding, application,

With powerful feedback, students fix mistakes, sharpen strategy, and achieve top results with confidence.

Term Test

Rapid Revisions

A woman with long dark hair, wearing a pink patterned shirt and black pants, is pointing with a black pen at a diagram of a human brain on a large digital screen. The brain diagram is white with some internal structures highlighted in purple. The screen also shows a clock in the top right corner displaying '2:05' and some interface icons.

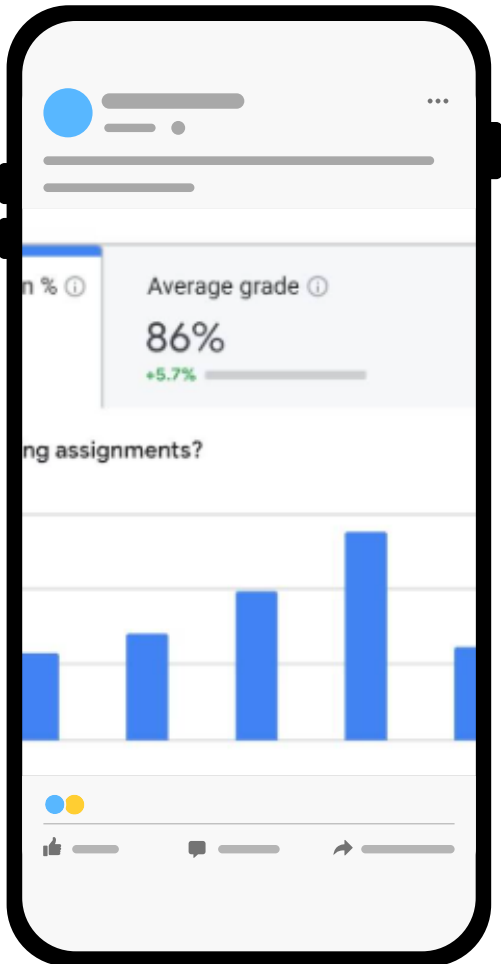

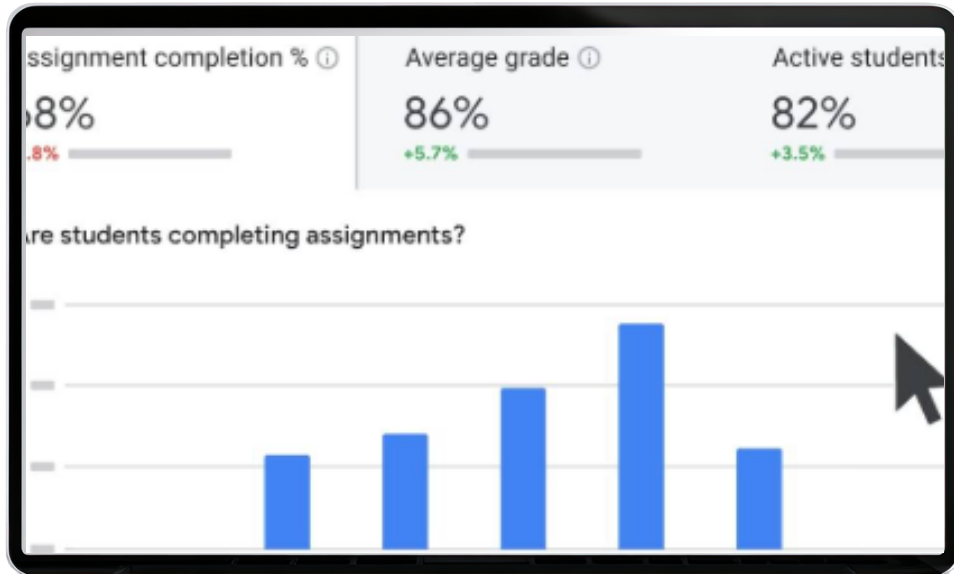

Revise the entire term in just 1–2 days. What seems impossible becomes achievable with expert, experience-based guidance

Fast, focused, and powerful

Turning preparation into exceptional results with confidence.

Rapid Revisions

On Time System

Every class starts on time, lessons are completed on time, and tests are conducted on time, ensuring perfect discipline and consistency.

A fully structured, goal-oriented system that guarantees complete syllabus coverage and drives students toward success.

Marking Scheme

Students are given model papers for practice, followed by a clear discussion with the marking scheme. This helps them understand how to answer correctly, avoid mistakes, and score maximum marks with confidence in exams.

Q.34 Mention the role of each component of blood.

Ans. Blood is a fluid connective tissue. It consists of a liquid medium called plasma in which the red blood corpuscles (RBC), white blood corpuscles(WBC), and platelets are suspended.

RBCs contain a red-coloured pigment called haemoglobin that helps to transport oxygen throughout the body.

WBCs are part of the body's immune system and help to detect and fight viruses and bacteria.

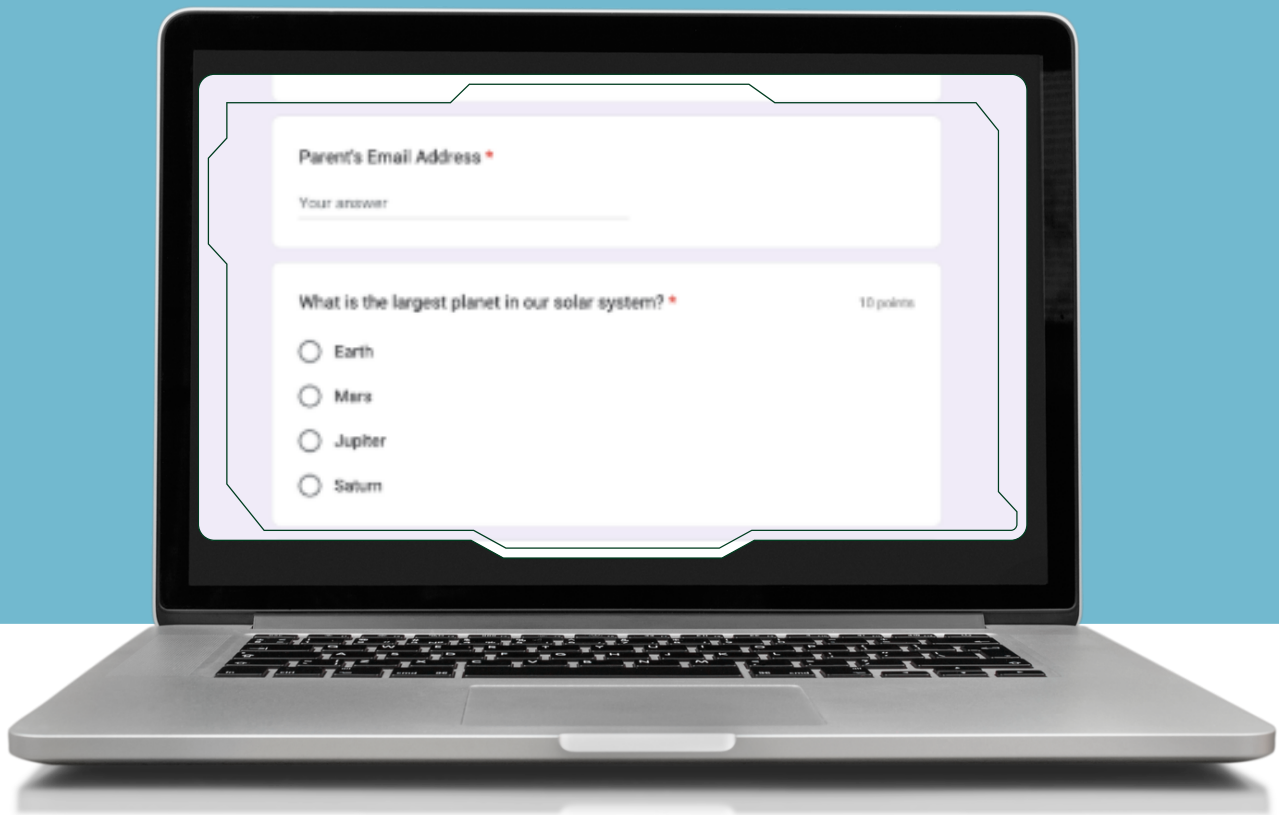

Plasma is a yellow liquid that helps to transport nutrients, CO₂, hormones, nitrogenous waste, and proteins in dissolved form.

Platelets and proteins in the plasma work together to stop bleeding by forming a clot over the injury.

Q.35 Complete the given table

Normal range of haemoglobin in males	
Normal range of haemoglobin in females	
Normal range of haemoglobin in children	

worksheets & Practicing questions

Turn learning into action with powerful,
exam-focused practice.
Master concepts, sharpen thinking, and
step into exams with confidence.
